

Exploros Vendor FAQ

Vendor Name: Exploros, Inc.

Product Name: Exploros Social Studies

Question	Answers
What grades are covered?	4 th -8 th Social Studies, World Geography, World History, US History Since 1877, United States Government, Economics
Is there a pre/post-test?	Yes.
What is Exploros?	The Exploros Social Studies assessment suite comes in the form of pre-tests, post-tests, exit quizzes, and unit reviews which contain STAAR 2.0 style assessments. Item types include multipart (EBSR), multi-select, constructed response, drag-drop, hot spot, inline choice, text entry, and hot text. In all, the program contains 6020 STAAR-like assessments. In addition to summative assessment, the digital core or supplemental program features learning experiences with formative assessment including graphic organizers, tables, drawings, and essays focused on TEKS content and skills. All items are TEKS-tagged and produce TEKS Analytics at the student, class, campus, and district levels for growth monitoring and instructional improvement.
What are Exploros Assessments Designed to do?	Exploros offers a pre-test that evaluates students' understanding of the Texas Essential Knowledge and Skills (TEKS) specifically focused on course readiness standards and those most commonly tested on the STAAR. The assessment emphasizes focus TEKS to provide a solid foundation for tracking student progress throughout the course. At the end of the year, a post-test is administered to measure growth based on pre-test performance. In addition to the pre-post testing instrument, Exploros offers a Texas Social Studies Program. With it, student progress can be monitored through TEKS Analytics, which automatically collects data from Exploros learning experiences, exit quizzes, unit reviews, and other artifacts. Exploros produces a digital learning portfolio of actual student work as further evidence of growth.
How can I use Exploros?	At the beginning of the school year, the course-specific pre-test can be administered using the Exploros platform. The Pre-Test is 20 items written in STAAR 2.0 form that informs teachers of student TEKS understanding. At the end of the year, an Exploros 20-item post-test (or associated STAAR test) can be used to measure end-of-year achievement. Exploros reporting provides information on the percentage score and TEKS-level gains between Exploros delivered pre and post-tests.

Does Exploros provide expected growth targets for students?	No. Exploros reporting can facilitate various district-selected growth target models (e.g. Graduated Percent Increase Model, Common Percent Growth Model, Half the Gap).
How can districts use Exploros to determine end-of-year student growth for purposes of TIA?	Exploros assists districts in determining end-of-year student growth by providing detailed reports by student, class, campus, and district detailing pre and post-test results. This information can then be used with district-selected growth target models to assess gains. Reporting provides information in aggregate or broken down by TEKS.
What types of data reporting capabilities are included with Exploros?	Pre and post-test heat maps provide item-by-item scoring on a student and class basis and can be viewed at the class, campus, or district level. Pre and post-test TEKS Analytics provide TEKS-based data, including responses, time spent, and score. Exploros can also provide real-time student progress monitoring, formative assessment dashboards, course progress analytics, and campus and district-level implementation analytics.
