

# Other Assessments and Resources for TIA

Below is a list of other resources that could be utilized as part of a student growth measure in a district's local designation system.

This is a mix of assessments, curriculum, and item banks. These products may or may not correspond directly to TIA student growth measures (Portfolio, Pre-Test/Post-Test, VAM, or SLO) districts would need to decide locally how to implement these products into their local designation system.

## Definitions:

**Assessment:** Evaluative tool to determine if students met learning outcomes.

**Curriculum:** A set of performance objectives paired with a set of materials to cover a course of study.

**Item Banks:** A cataloged collection of test items that can be used to create local assessments.

**Performance Assessment:** Demonstrating knowledge and skills through a performance task (Dance Recital, School Play).

**BOY:** Beginning of the year

**EOY:** End of the year

## Please note:

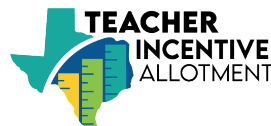

1. The use of these resources does not guarantee district approval of their local designation system.
2. This list does not signify a TEA endorsement.
3. All resources on this list must meet the requirements in the Readiness Checklist for test administration, security, and scoring.
